

What's New in SafeGuard Enterprise 6.1

Features	SafeGuard 6.1	SafeGuard 6.0	SafeGuard 5.6
Extensive platform support			
NEW! Support for Windows 8 and 8.1 - Protect hard disks and files stored on removable media, network file shares and in the cloud on clients running Windows 8 and 8.1	✓		
NEW! Manage Apple FileVault 2 encryption - Manage Apple FileVault 2 full-disk encryption side-by-side with all other devices in the SafeGuard Management Center console	✓		
NEW! Encrypt files and folders on Mac - Encrypt Mac files and documents with SafeGuard File Encryption for Mac, letting users easily share encrypted documents between Mac and Windows clients	✓		
Mac compliance reporting - Track information about Macs encrypted by Sophos full-disk encryption in the Management Center to make sure you are compliant	✓	✓	
ENHANCED! Manage Microsoft BitLocker encryption - Centrally manage computers encrypted with Microsoft BitLocker for better performance and hardware compatibility	Enhanced	✓	✓
NEW! Support for eDrive and OPAL 2 self-encrypting drives - Centrally manage encryption on clients with the latest eDrive and OPAL 2 self-encrypting drives	✓		
Support for OPAL self-encrypting drives - Automatically make use of OPAL self-encrypting drives when available	✓	✓	✓
Encryption everywhere			
NEW! Support for additional cloud storage providers - Auto-detect install paths and folders for more cloud storage providers: Dropbox, Google Drive, Egnyte, OneDrive and Media Center	✓		
NEW! Support for shared PCs, workstations on wheels (WoWs) - Improved user handling allows multiple users to log on to a PC after POA startup	✓		
ENHANCED! Automatically encrypt files stored in the cloud - Add extra layer of protection to documents stored in the cloud with SafeGuard Encryption for Cloud Storage	Enhanced	✓	
ENHANCED! Access encrypted files everywhere - Collaborate freely and still stay protected using encrypted documents accessible everywhere: on Windows, Mac, home PCs, smartphones and tablets	Enhanced	✓	
Encrypt files on network file shares - Guarantee that only the right people have access by using SafeGuard Encryption for File Shares to encrypt files and folders at rest and in transit	✓	✓	
Encrypt files on removable media - Protect data on removable devices: USB sticks, CD/DVD, memory cards, external hard disks, etc.	✓	✓	✓
Full-disk encryption with Sophos' encryption technology - Encrypt hard disks with certified and proven encryption technology, including FIPS and CC EAL 4	✓	✓	✓
Security and simplicity			
NEW! Management Center made simpler - Work faster and easier with the dozens of usability improvements such as simplifying default options and pre-populating policies	✓		
NEW! Key ring creation works without re-boot/re-logon - Save time by no longer having to restart the client after creating a new key ring	✓		
NEW! Credential provider wrapping for Imprivata and Evidian - Use alternative credential providers without having to authenticate twice	✓		
ENHANCED! Flexible Web Helpdesk logon - Manage access rights by adding or removing Windows users or groups and expanded logging options per user	Enhanced	✓	✓
ENHANCED! Active Directory (AD) synchronization, manual and scheduled - Search and import objects directly in the AD instead of re-syncing the whole AD tree	Enhanced	✓	✓
Hierarchical Security Officer role management - Assign what Security Officers can see and manage with granular access control and easy delegation	✓	✓	
Central key, policy and device management - Use one platform-neutral console to get instant access to every aspect of your data protection and see every policy, key, user and machine	✓	✓	✓

What's New in SafeGuard Enterprise 6.1

Features	SafeGuard 6.1	SafeGuard 6.0	SafeGuard 5.6
Protection plus performance			
AES-NI processor optimization - Get faster initial encryption and better operating performance with optimization for the latest AES-NI technology built into the latest i5 and i7 processors	✓	✓	
Faster boot-up by loading POA to RAM-disk - Boot clients faster by pre-loading the read-only part of the POA into a RAM-disk at startup	✓	✓	
Multi-core support - Harness the full power of your multi-core processor and run more processes simultaneously for faster encryption and decryption than ever	✓	✓	✓
Fast initial encryption - Only encrypt the parts of your hard drives that contain data to reduce encryption time significantly and to get your users back to work faster	✓	✓	✓
Other features and improvements			
NEW! Copy SafeGuard Portable application only when needed - Only copy the SafeGuard Portable application when writing encrypted content to removable media or cloud storage	✓		
File tracking on removable media - Easily verify which corporate files were on any lost removable media and prove that they were encrypted for compliance purposes	✓	✓	
Power-on Authorization and single sign-on - Log on to the operating system without hassle through single sign-on and flexible Power-on Authorization	✓	✓	✓
